Professional Experience

February 2011 - September 2014
Research Assistant - Hewlett-Packard
Guadalajara, México

Collaborating with researchers from HP Labs California, towards the creation of software systems from the Information Analytics Lab (IAL). Implementing programming languages and tools that best fit the requirements of each project, while using agile methodologies such as Scrum, Extreme Programming and Kanban in order to quickly develop functioning prototypes.

January 2010 - July 2010
Emerging Technologies Developer - University of Colima
Colima, México

Working as an intern, I helped CENEDIC to investigate then emergent technologies such as Silverlight and Flex, with the aim of implementing them in the current projects that were being developed by CENEDIC.

July 2009 - November 2009
Software Developer - University of Otago
Dunedin, New Zealand

Collaborating on the development of an informatics kiosk for the University of Otago based on web technologies, using PHP as programming language and PostgreSQL as database management system.

January 2009 - July 2009
Software Developer - University of Colima
Colima, México

I participated in the creation of a Web-based system being developed at the CENEDIC for the University of Colima, using tools like ASP.Net as the programming language and SQL Server as the database management system.

Education

September 2014 - September 2015
University of Edinburgh - UK
Postgraduate degree in Artificial Intelligence

July 2009 - December 2009
University of Otago - New Zealand
Proficiency in Science, Exchange Programme

July 2006 - July 2010
University of Colima - México
BSc. in Telematics Engineering
